ASSET PERFORMANCE MANAGEMENT
TAKEN TO A NEW STRATEGIC LEVEL

strEAM+ for IBM Maximo

ASSET PERFORMANCE MANAGEMENT TAKEN TO A NEW STRATEGIC LEVEL

In asset-intensive industries, the overall performance of companies depends on the reliability of their plants and equipment. Many companies are struggling to create the sustainable results needed to cope with today's challenges of cost efficiency, regulatory compliance, and continued profitability. StrEAM+ for IBM Maximo offers a clear path towards realizing your business ambitions.

strEAM+ is an Asset Performance Management software suite developed by MaxGrip, the global business partner for asset-intensive organizations. Fully embedded into IBM Maximo, strEAM+ predicts risks and prevents failures, helping you to maximize uptime and get the most out of your capital assets. Getting a maximum grip on asset performance is finally within easy reach.

At MaxGrip, we believe that fact-based, real-time insight into your asset reliability is the future of asset performance management. We believe that unplanned downtime is no longer acceptable, and that most incidents generally classified as unforeseen and unavoidable, are predictable and preventable. It is our mission to provide the best software to mitigate all asset-related risks.

COMPLIANCE MANAGER
Safety management
Regulatory compliance

RISK BASED INSPECTION (RBI)
Prioritized inspection plans
Cost control

**RELIABILITY CENTERED
MAINTENANCE (RCM)**
Defining the ideal APM strategy

ROOT CAUSE ANALYSIS (RCA)
High-impact failure prevention

MAINTENANCE MODELS
Superior data management

PREDICTIVE MODELING
Simulation and optimization

strEAM+ predicts risks and prevents failures, helping you to maximize uptime and get the most out of your assets.

THE RIGHT BALANCE

Strategic Asset Performance Management (APM) is not easy to pull off. Striking the right balance between costs, safety, quality and availability is increasingly complicated. The gut feelings of your operators and maintenance engineers can save the day, but the days of running things with a few Excel-sheets are gone. Gaining full control over your operations means gaining deep insight into your data first, including all asset connections and interdependencies.

Research indicates that companies applying strategic APM are among the market leaders in their industries. These companies have also demonstrated the huge potential for cost savings. The alignment of processes and resources, the

superior capex planning, the auditable risk management, and the improved data use for consistent decision-making all contribute to better teamwork and better results.

The harmful effects of failing assets may go far beyond production losses, and endanger the safety of people and the environment. Whichever way you look at it, prevention is the better option. And with the new international Asset Management standard ISO55000 on the way, you will soon no longer have a choice whether or not to make sound asset management a priority. The good news is that implementing a truly integrated APM strategy is more attainable than ever before.

**Compliant with global industry standards
SAE JA1012 and ISO 55000/ISO 14224.**

MaxGrip is dedicated to the success of your asset performance management. Getting the job done also means you can count on 24/7 support for 365 days a year.

A WAY OF LIFE

Many companies hire expensive consultants to set up an asset performance strategy. New processes are introduced and assets categorized. Time goes by and cost goes up, but there is still no effective method to prioritize activities. New reliability software ends up on a shelf, as it proves difficult to engage your staff in a whole new way of working. strEAM+ bypasses all of these pitfalls. Addressing your strategic and operational questions at the same time, supported by a system that focuses attention only where it is needed, soon becomes a way of life.

strEAM+ is directly embedded into the familiar IBM Maximo environment. The seamless data integration and intuitive user experience ensure quick adoption by everyone involved. From

day one, the software provides you with a structured overview of critical assets and the priorities in your maintenance organization. With a typical ROI of less than a year, and without hampering any normal business processes, strEAM+ gives your strategic APM the best possible start.

With real-time data on asset reliability at the heart of your system, you reach a whole new level of risk control. The criticality of your assets is balanced against your business objectives in terms of output, quality, compliance, costs and safety. strEAM+ shows how different maintenance strategies affect these objectives. It generates the data that makes all analysis and activities fully traceable, and paves the way for sound decision-making.

strEAM+ balances asset criticality against your business objectives for output, quality, compliance, costs and safety.

The unique advantages of strEAM+ at a glance

FULLY EMBEDDED IN EAM

As strEAM+ is fully embedded in IBM Maximo, there is no need for any change to your existing IT infrastructure.

USER FRIENDLINESS

The familiar IBM Maximo user interface enables users to more easily make asset reliability a part of everyday life and meet reliability objectives.

STRATEGY

The integration of proven methodologies (RCM, RBI and RCA) creates a strategic and holistic approach to asset performance management.

EFFICIENCY

Real-time reliability data allow for well-founded criticality analysis, efficient prioritization and direct insight into workflow management.

RELIABLE SUPPORT

MaxGrip is dedicated to the success of your asset performance management. Getting the job done also means you can count on 24/7 support for 365 days a year.

EXTENSIBILITY

strEAM+ allows you to pick and choose according to your needs from a suite of enhanced modules, including RCM, RBI, RCA, Compliance Manager, Maintenance Models, and Predictive Modeling.

COMPLIANCE

Managing asset performance with strEAM+ for IBM Maximo guarantees data integrity and ensures your regulatory compliance.

FLEXIBILITY

The modular structure of strEAM+ for IBM Maximo allows for scalability and the effortless introduction of new assets and resources.

CONTROL

Data integrity and auditability, combined with extensive management and functional reporting, provide total control of your asset management strategy.

FAST ROI

The quick and low-cost implementation of strategic maintenance plans typically leads to a return on investment within 12 months.

EFFECTIVE

strEAM+ balances fact-based insight into asset risks against your business objectives in terms of output, quality, compliance, costs and safety.

Powered by MaxGrip

strEAM+ is a solution of MaxGrip, the world's front-runner in Asset Performance Management. Directly embedded into your EAM system, strEAM+ ensures easy adoption, operational focus on reliability, data integrity and real-time insight into asset performance. strEAM+ is the best integrated software solution available today to efficiently balance risks and costs against your business objectives.

MaxGrip is innovative and ambitious. It is our mission to make the world a safer place. We believe that all asset-related incidents can be prevented. By analyzing risks and optimizing maintenance, we enable our clients to focus on their core business and make continuous improvement a way of life.

MaxGrip has an exceptional track record in bridging the gap between theory and practice. We live and breathe reliability, using only proven methodologies to help clients everywhere to meet their Asset Performance Management objectives. The world's largest enterprises already rely on MaxGrip every day.
