GEMBA
ASSETMANAGEMENT

IBM's and Gemba statements regarding its plans, directions, and intent are subject to change or withdrawal without notice at IBM's and Gemba's sole discretion. Information regarding potential future products is intended to outline our general product direction and it should not be relied on in making a purchasing decision. The information mentioned regarding potential future products is not a commitment, promise, or legal obligation to deliver any material, code or functionality. Information about potential future products may not be incorporated into any contract. The development, release, and timing of any future features or functionality described for our products remains at our sole discretion. Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon many factors, including considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve results similar to those stated here.

IBM Control Desk volgende versie

GEMBA
ASSETMANAGEMENT

Nieuwe weergave volgens carbon design systeem

The screenshot displays the IBM Control Desk GEMBA Asset Management interface. On the left, a sidebar contains navigation options: Available Queries (All Records, All Bookmarks, All Service Requests), Common Actions (New Service Request, Change Status, Select Owner, Take Ownership, Create KPI, Service Request in queue, Service Request in progress, Pending Service Request, Resolve Service Request, Create Report), and More Actions (Attachment Library/Folders, Run Reports, Cognos Analytics).

The main area shows a list of Service Requests (1 - 20 of 139). The table columns are: Service Request, Summary, Reported By, Priority, Status, Owner, and Owner Group. The data rows are:

Service Request	Summary	Reported By	Priority	Status	Owner	Owner Group
1001	Request for OS upgrade to Windows XP	LIBERI	4	QUEUED	CALDONE	
1002	Conference room is too hot	WINSTON	4	QUEUED		TIER1
1004	Keyboard Not Functioning - Desktop	LOU	1	RESOLVED		
1005	Laptop shows blue screen when I try to VPN.	WALL				
1006	Can't print from MS Word. Others software work fine.	JONES				
1007	Need MS SQL in my development computer.	MILLS				
1008	Error when printing Excel.	BOYD				
1015	Desktop shows blue screen when turned on.	LIBERI				
1016	Could you please send me URL to access the company Intranet?	LIBERI				
1017	How do I protect my computer from virus?	LIBERI				
1020	Desktop Performance Problems	SMITHERS				
1021	Printer out-of toner.	ROBERTS				
1022	I need to access ITSM folder in my Outlook. How do I do it?	SMITH				
1023	New employee setup.	MILLER				
1026	Move computer	PEDRICK				

The right pane shows the 'Create Service Request' form. The fields are:

- Reported By: GEMBA
- Asset: [Empty]
- Phone: [Empty]
- Location: [Empty]
- E-mail: w.schouten@gemba.nl
- Configuration Item: AD34FG (Computer System)
- Affected User: KAZMIER
- Reported Priority: [Empty]
- Reported Date: 28-10-21 11:55

The bottom section contains the 'Request Description' and 'Summary' fields. The 'Request Description' field has a placeholder text: 'Please enter a summary and a more detailed description of your Service Request.' The 'Summary' field contains the text: 'Request for Service,IT,New/Upgrade Software,Operat'. The 'Details' section shows a rich text editor with the text: 'Service request - A formal user request for something new to be provided'. The right pane also shows the 'Classify' section with a 'Classification' dropdown set to '2 \ 201 \ 20102 \ 2010202' and a 'Class Description' field containing 'Request For Service \ IT \ New/Upgr Sftw \ Op System'. The 'Attachments' section shows a list of attachments with columns 'Document' and 'Description'. The attachment '1020' has the description 'puzzelstukjes.jpg'.

Jira Integratie

- Automatisch aanmaken van issues in Jira op basis van ICD incidenten.
- Status updates van Jira issues worden automatisch doorgezet naar IBM Control desk incidenten.
- Updates van beschrijving, prioriteit van een issue in Jira wordt doorgezet naar IBM Control Desk. Comments in Jira worden doorgezet als worklogs in IBM Control Desk incidenten.

• Period:

• Lead Craft:

CONS

• Duration:

0:00

Next

Create new work order

Prioritization

1. Mitigation

2. Prioritization

2. Consequence Category (P,A,E,R)

Prioritization Matrix

If we don't act, at which aspect can we expect a consequence? "Category" (After mitigation)
Determine this for all four consequence categories and select.
① Goal is to determine which consequences we managing. (could be more than one)

• People:

Y

• Asset:

Y

• Environment:

Y

• Reputation:

Y

People Severity:

P1A

7

Asset Severity:

A2A

6

Environment Severity:

E3A

5

Reputation Severity:

R4A

4

SEVERITY	LIKELIHOOD				
	A	B	C	D	E
1	7	6	5	4	3
2	6	5	4	3	2
3	5	4	3	2	1
4	4	3	2	1	1
5	3	2	1	1	1

3. Consequence Severity

If we don't act, what is the potential severity of the consequence after mitigation.
Use the "Severity" criteria of the Corrective Maintenance Risk Assessment Matrix for all valid categories.
① The potential severity criteria you will find in the category columns of the Corrective Maintenance Risk Assessment Matrix

• People Severity:

1

• Asset Severity:

2

• Environment Severity:

3

• Reputation Severity:

4

The order of Consequence Categories in case the result are equal is : P,A,E,R. E.g. if "P" and "A" Consequence Categories are equal after the prioritisation assessment than the category is set as "P"

Result

Priority:

4

8 Weeks - Routine

4. Likelihood of occurrence

If we don't act, when will the consequence potentially hit us after mitigation? "Likelihood" (E t/m A)
Select the "Likelihood" by means of the severity criteria of the Corrective Maintenance Risk Assessment Matrix.
① Read the Corrective Maintenance Risk Assessment Matrix. "Likelihood" boxes from right "E" to left "A"

Likelihood of occurrence:

A

Traditionele Maximo/ICD installatie

Maximo/ICD 8.x installatie

- Maximo/ICD 8.x wordt geïnstalleerd via Containers binnen een Container framework
- Maximo/ICD 8.x heeft zwaardere systeemeisen
- Maximo/ICD 8.x kan geïnstalleerd worden op een infrastructuur die bestaat uit on prem en cloud omgevingen.
- Applicatieserver, database server, applicatie ICD/Maximo binnen container omgeving

- Gemba heeft de eerste MAS openshift omgevingen inmiddels geïnstalleerd
- Uitgebreide interne kennis vorming op basis van Redhat, Kubernetes, Docker en Openshift
